

FbF® LiveScan Bundle

with Green Bit DactyScan84c

FbF® LiveScan is modern and intuitive live scan software that is integrated with the Green Bit DactyScan84c ten-print scanner. Experience an error reduction in the capture process and increase the capabilities and speed of ten-print capture.

The software is FBI/SWFT certified and transmits fingerprint datasets to FBI, TSC, SWFT/OPM, NFA/ATF, FBI Channelers and some state agencies. **FbF LiveScan** is certified in Georgia, Texas, Florida & North Carolina. For submission in other states, the print to card function (license required) will digitally capture fingerprints and print them on a card which can be mailed.

With up to 27 frames per second for 4-slaps and up to 25 frames per second for rolled prints acquisition, the DactyScan84c is unique in terms of acquisition speed.
