

FbF® LiveScan Bundle

with Suprema RealScan-G10

FbF® LiveScan is modern and intuitive live scan software that is integrated with the Suprema RealScan-G10 scanner. Experience an error reduction in the capture process and increase the capabilities and speed of ten-print capture.

The software is FBI/SWFT certified and transmits fingerprint datasets to FBI, TSC, SWFT/OPM, NFA/ATF, FBI Channelers and some state agencies. **FbF LiveScan** is certified in Georgia, Texas, Florida & North Carolina. For submission in other states, the print to card function (license required) will digitally capture fingerprints and print them on a card which can be mailed.

The RealScan-G10 is FBI IAFIS Appendix F certified which provides assurance to users that the scanner meets or exceeds FBI interoperability standards and will work with the IAFIS. It ensures that the images used are high quality and support all phases of identification for fingerprint experts and the IAFIS. Suprema RealScan-G10 is compact, portable and can be used for single finger flats, rolls and four finger slaps.
